

AvenirRegistry

A modern share registry, standalone or combined with the depository.

WHAT IT DOES

AvenirRegistry maintains the authoritative record of who owns what. It handles certificated and dematerialised holdings, runs corporate actions and proxy voting, and gives registrars the controls and audit trail their obligations demand.

It can run as a standalone registry or alongside AvenirCSD as one connected record, and it is CREST-eligible. Holders can validate certificates from a smartphone through a QR code, closing a long-standing fraud gap.

CAPABILITIES

Holdings

Both forms of holding, one record.

- Certificated holdings
- Dematerialised holdings
- A single legal ownership record

Corporate actions

The full calendar, mandatory and voluntary.

- Dividends, interest and bonus issues
- Meetings and proxy voting
- Reorganisations

Certificate validation

Verify authenticity in seconds.

- QR-coded certificates
- Smartphone validation
- Tamper-evident records

Registrar capability

Built to registrar standards.

- CREST-eligible
- Full audit trail
- Regulator and issuer reporting

TECHNICAL PROFILE

Deployment	Cloud-native, on-premise or hybrid. The same platform, deployed to suit your data-residency and operational requirements.
Messaging	SWIFT ISO 15022 and ISO 20022, with documented native APIs and CREST connectivity.
Throughput	Built to hold and service large registers across many issuers, with real-time updates.
Integration	AvenirCSD, issuers and their agents, payment systems and regulators.

A detailed deployment diagram is provided during scoping.

A decade

A depository client live and supported on our registry platform for around ten years.

Request a demo

We will scope a deployment to your register, your corporate-actions calendar and your timeline.
